

What to do in an Emergency

KEEPING MULWALA INFORMED

In the 80 years the site has been operating there has never been a need to use the emergency response. In almost all circumstances you should never need to do anything in the event of an emergency, as it will be controlled by the emergency services and factory personnel. Please follow the process outlined unless specifically directed otherwise by emergency services.

DURING AN EMERGENCY

- 1** You will be notified by the appropriate emergency services.

- 2** Immediately go indoors.

- 3** Close doors and windows.

- 4** Turn off air conditioners and exhaust fans.

- 5** Remain indoors until you receive further instructions from the emergency services.

- 6** Tune your radio or television and listen for the 'all clear' to be announced. Keep phone lines free.

AFTER AN EMERGENCY

- 7** After the 'all clear' has been announced, open doors and windows to restore ventilation.

- 8** The 'all clear' will be provided by emergency services, radio and website (updates will be provided on local ABC Radio and at www.emergency.nsw.gov.au).

EMERGENCY GUIDELINES

Alarms

The facility siren does not necessarily indicate an emergency. Activation of the siren does not require a response from the local community.

Site Emergency Procedure

All personnel on site are trained in what to do in the event of an emergency. The factory is well placed to deal with any situation through procedures and a trained emergency response team works closely with state emergency services to ensure the best possible response in any emergency.

Phone

If you have concerns that an emergency has occurred at the Mulwala Facility you can call the information line on **(03) 5742 2210** or email Mulwala.MHF@thalesgroup.com.au
